Course Description

Have you ever painted with a comb or with rubber bands? Let's discover the awesome ways we can complete a painting. Students will learn how to use different mediums and techniques to create their own type of art with objects that are used in everyday life.

Student Goals

Each session, students learn about famous artists working in the media. We learn about and assess how artwork impacts emotion. There's always room for improvement, so we'll brainstorm ideas of how to improve art.
